Chasing Cell Phone – Aaron Edens	0	0	6	31	42	79

Significant Comments:

Amazing teacher; put complex issues into understandable and approachable information.
Excellent
Excellent class, picked up a few new tricks and solidified a few old ones.
Excellent instruction.
Gave up to date material and useful information regarding cell phones
Good class. I would have liked to see a break down on a case or two on how the information was used. I use cell phone data and at times know there is more I can get out of it, but just looking for some samples.. GOOD class.
Good info. Please spend less time on the history of cell phone laws and more time on tricks and other website stuff. Need to know more on how to unlock password protected cell phones, sites to get subscriber info, maybe an updated handout on law enforcement back lines...
Good instructor, good information that i had no idea about.
Got lots of information from class. Instructor very knowledgeable
Great class. I work with cell phones a lot and this information will help me. Awesome instructor very knowledgeable.
Great class. I learned some important information that we have not been doing to strengthen our cases.
Great information, wish the class was longer.
Great instructor.
Great instructor. He did a fantastic job
Had a wealth of knowledge to share and unfortunately not enough time. I could take a 2 day course from him alone. Made everything about phones relevant to investigations and was very cop friendly with technical concepts.
He knew his information. He could have been better taken his time explaining all of the tech stuff
I really enjoyed this class, I would like to attend his class if he has a longer one.
I thought the instructor presented the info very clearly, and I was able to retain a large amount of the course.
I would like to have seen some search warrant shells.
Instructor made a dry subject very interesting. His practical applications for the information as well as the limit of the information were very valuable. There was so much useful information that I know I missed a bunch. I would gladly see this class again. He also explained the current state of the law for searching a cell phone in a way that made the technology and the law make sense to me. Finally, and I'm a lawyer!
The information presented was great. I thought the class would be more geared towards obtaining orders, search warrants, and the applicable use by investigators. It seemed more aimed at forensic employees.
The templates on the thumb drive should be word documents instead of PDF.
This class is emerging and needs to be given more time. Cellphones are now always involved in dope dealing and methods to get ahead of the dealers should be given much more time.
Unfortunately this was only a 4 hour block of instruction. This could have easily been twice as long. Instructor was very up to date and knowledgeable.
Very good information and critical topic. I would like to have had more information on getting into phones and extracting data rather than information on cell tower design.
very good instructor he had alot of knowledge
Very informative class, easily the most new information obtained by me of any class.
Very informative class. Great class content.
