NEWS RELEASE

Title: POLICE TECHNICAL forges trailblazing partnership with FLY ROBOTICS

Short Title: POLICE TECHNICAL Partners with FLY ROBOTICS

Date of Release: April 30, 2015

POLICE TECHNICAL is pleased to announce a new partnership with FLY ROBOTICS.

As a part of the collaboration, POLICE TECHNICAL is providing total small unmanned aerial systems [sUAS] solutions to law enforcement and public safety, including online and hands on training in: Basic Ground School, Flight School, as well as Advanced Mission Planning and Payloads.

“The relationship brings together two experienced, results driven companies, whose dedication to training and education is unparalleled in the industry,” said Thomas Manson, CEO of POLICE TECHNICAL.

According to the Federal Aviation Administration [FAA], sUAS are being deployed in a growing number of organizations nationwide. As stated in their forecast for 2015-2035, applications will surge in three areas: aerial photography, precision agriculture, and Law Enforcement.

Tim Hurley, Director of Operations for FLY ROBOTICS, said police departments and agencies will lead the way.

“This is the future of Public Safety. We’re making sure the deployment is done in a safe and professional manner—just like every other piece of equipment utilized by Law Enforcement,” Hurley added.

Manson said the new training solutions are designed to dispel any myths and demonstrate ideal methods for a Public Safety environment.

“The nearly 10,000 members of COMMUNITY [POLICE TECHNICAL’s online services and solution site] expect the best in technical solutions from us,” Manson said. “Together with FLY ROBOTICS we’ll be able to continue that service [in the sUAS space] by rapidly expanding to fill the knowledge vacuum that currently exists.”

FLY ROBOTICS brings a unique mix of experience, expertise, and dedication to training to the table. Of the dozens of companies entering this space, Manson said only one truly shared POLICE TECHNICAL’s passion for service to law enforcement.

“It’s the exact foundation of this company,” Manson said. “Both companies strive to offer more than solutions in the sUAS space. We’ll make a difference in the lives of the people we serve, and in turn, they will make difference in their communities.”

Additional information on the flight school is available at <https://www.policetechnical.com/search-classes/?state=0&month=0&instructor=0&course=23>.
