

# INTRODUCTION TO TACTICAL HACKING

A Guide for Law Enforcement

By Jeff Neithercutt

*"Jeff Neithercutt did an excellent job of taking a very complex subject and making the material very easy to understand ... Any police officer would benefit from reading this book."*

--LT. PATRICK SULLIVAN, CANTON TOWNSHIP PD (MICHIGAN)

An increasing amount of departments nationwide are utilizing tactical hacking techniques in barricaded suspect situations and other investigations. Yet, a lack of training and dedicated resources have left personnel scrambling to remain informed and prepared.

In his debut, Jeff Neithercutt provides an overview of this growing field, from building a full tactical hacking lab to legal concerns to best practices.

*"This book is very educational and was very entertaining to me as a computer savvy reader."*

--DET. FREDERICK SANKS, HALLANDALE BEACH PD (FLORIDA)

*"The author's command of open source tools was one of the biggest strengths of the book."*

--DET. DAVID MAYER, BROOMFIELD PD (COLORADO)

Jeff Neithercutt has been a police officer in Northern California for nine years. He received his Master's in Cyber Security and Information Assurance at National University and his Bachelor's in Criminal Justice Administration from California State University East Bay. He currently resides in California with his family.
